USTDA funded a technical assistance program in Kenya that has helped fast track the development of geothermal resources in the country using equipment and services sourced from a Tucson-based supplier and eight additional U.S. firms.

$111 in U.S. exports of goods and services for every dollar programmed

- 28,000 U.S. jobs supported by USTDA programs in FY18 (estimated)
- 563 Foreign buyers brought to the United States by USTDA in FY18
- 111:1 $111 in U.S. exports identified in FY18 from USTDA’s work
- 26 Years USTDA has been supporting U.S. jobs through exports

As a result of a USTDA-funded grant, First Solar (Tempe, AZ), gained the opportunity to supply the generation equipment, engineering, procurement, and construction services for a 100 MW solar plant in Ma’an, Jordan. According to the USTDA grantee, Kawar Energy, First Solar offered the most reliable solutions in hot weather conditions and performed the best during peak demand, as compared to other competitors.

USTDA funded a technical assistance program in Kenya that has helped fast track the development of geothermal resources in the country using equipment and services sourced from a Tucson-based supplier and eight additional U.S. firms.
