

China LNG and Gas Infrastructure

REVERSE TRADE MISSION

BUSINESS BRIEFING | MARCH 22, 2018 | HOUSTON, TEXAS |

The **U.S. Trade & Development Agency** is hosting the China LNG & Gas Infrastructure Reverse Trade Mission to connect senior level decision-makers from China to innovative U.S. technologies, equipment and services across the entire gas value chain (including U.S. LNG exporters).

Business Briefing
Thursday, March 22, 2018
Houston, Texas – 8:00am-2:30pm

As part of the visit, USTDA is hosting a Business Briefing for U.S. companies where they can learn about China's gas sector goals and upcoming procurements. Participants will have the chance to meet with delegates one-on-one to showcase U.S. technologies, equipment and services that can support China's increased gas utilization.

Registration is Required - Save Your Seat Today!

Potential Exports:

- Water efficient and deep extraction technologies
- Drilling or operational services for shale gas
- Technologies and expertise in other unconventional gas sectors such as tight gas, coal-bed methane, and coal gasification
- LNG

Delegates Represent:

- Guangdong Yudean Natural Gas Co., Ltd.
- Tianjin Energy
- Sinochem Oil Co., Ltd.
- China ZhenHua Oil Co., Ltd.
- China Huadian Green Energy Co., Ltd.

Background

China plans to nearly **double its gas supply from 196 bcm in 2015 to 360 bcm by 2020, and more than triple it to 600 bcm by 2030**, but the country does not have the natural gas resources to sustain that vision. That means China must expand its importation of LNG, and the technologies and services associated with the effective import, distribution, regulation and utilization of this precious global commodity. That is why **leading market forecasters estimate the value of China's import market to reach nearly \$30 billion annually by 2030**. This increased demand presents tremendous opportunities for U.S. energy companies. To learn more, [register](#) for the Business Briefing today!
