

USTDA'S MISSION AND TOOLS

The U.S. Trade and Development Agency connects America's private sector to infrastructure projects in developing and middle-income countries. We achieve success by funding feasibility studies, technical assistance and pilot projects that integrate the innovation and expertise of American companies. USTDA also connects overseas buyers with U.S. sellers by hosting reverse trade missions, industry conferences and expert workshops across the globe.

Proven Results For Montana Businesses

As a result of a USTDA feasibility study, two Montana-based companies supplied equipment to support the development of Honduras' first geothermal power plant.

Now in operation and supplying power to an estimated 100,000 homes every day, the plant has helped Honduras expand energy access and diversify its energy mix to include clean and renewable energy sources.
