1. Have you experienced any of the symptoms in the list below in the past 48 hours¹?
   - Fever or chills
   - New or unexplained onset of cough, shortness of breath, or difficulty breathing
   - New or unexplained loss of taste or smell
   - New or unexplained muscle aches

   **YES**
   - STOP
   - Access to USTDA Facilities Not Approved

   **NO**
   - Proceed to Question 2

2. Are you isolating because you tested positive for COVID-19² or are sick and suspect that you have COVID-19 but do not yet have test results²?

   **YES**
   - STOP
   - Access to USTDA Facilities Not Approved

   **NO**
   - Proceed to Question 3

3. Have you been exposed to the virus that causes COVID-19 in the last 10 days³?

   **YES**
   - Proceed to Question 4

   **NO**
   - Proceed to Question 5

4. Did you have a negative COVID-19 test result from a test taken 5 full days after your last exposure to the person who tested positive for COVID-19? (If it hasn’t yet been 5 full days since your last exposure, select “YES”).

   **YES**
   - Proceed to Question 5

   **NO**
   - STOP
   - Access to USTDA Facilities Not Approved

5. Have you traveled internationally in the past 10 days?

   **YES**
   - Proceed to Question 6

   **NO**
   - Access to USTDA Facilities Approved

6. Are you up to date⁴ with your COVID-19 vaccinations?

   **YES**
   - Access to USTDA Facilities Approved

   **NO**
   - Proceed to Question 7

7. Have you traveled internationally in the past 5 days?

   **YES**
   - STOP
   - Access to USTDA Facilities Not Approved

   **NO**
   - Access to USTDA Facilities Approved
¹This symptom list was developed using a scientific approach by CDC scientists who reviewed the literature and studies to determine which symptoms are most predictive of COVID-19. If you have had any of these symptoms in the last 48 hours, DO NOT physically return to the workplace until symptoms have been improving for more than 48 hours.

²Regardless of vaccination status, you should isolate (https://www.cdc.gov/coronavirus/2019-ncov/your-health/isolation.html) from others when you have COVID-19. You should also isolate if you are sick and suspect that you have COVID-19 but do not yet have test (https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/testing.html) results.

³If you were exposed to the virus that causes COVID-19 (https://www.cdc.gov/coronavirus/2019-ncov/your-health/if-you-were-exposed.html) or have been told by a healthcare provider or public health authority that you were exposed, get tested at least 5 full days after your last exposure.

⁴You are up to date with your COVID-19 vaccines (https://www.cdc.gov/coronavirus/2019-ncov/vaccines/stay-up-to-date.html) when you have received all doses in the primary series and all boosters recommended for you, when eligible. Use the COVID-19 Booster Tool (https://www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html) to learn if you should get a booster to stay up to date with your COVID-19 vaccines. Answer “No” if one of the following applies to you:

- It has been 5 months or more since you completed your primary series of Pfizer-BioNTech or Moderna and have not received a booster
- It has been 2 months or more since you completed your primary series of J&J’s Janssen and have not received a booster
- Staff who are immunocompromised and/or 50 years or older ONLY: It has been more than 6 months since your first booster and you have not received your second booster
