Vulnerability Disclosure Policy

March 25, 2021

Introduction
The U.S. Trade and Development Agency (USTDA) is committed to maintaining the security of our systems and protecting sensitive information from unauthorized disclosure.

This policy is intended to give security researchers clear guidelines for conducting vulnerability discovery activities and to convey our preferences in how to submit discovered vulnerabilities to us. This policy describes what systems and types of security research are covered under this policy, how to send us vulnerability reports, and how long we ask security researchers to wait before publicly disclosing vulnerabilities.

We encourage security researchers to contact us to report potential vulnerabilities identified in USTDA systems. For reports submitted in compliance with this policy, the USTDA will acknowledge receipt within five business days, endeavor to timely validate submissions, implement corrective actions if appropriate, and inform researchers of the disposition of reported vulnerabilities.

Authorization
If you make a good faith effort to comply with this policy during your security research, we will consider your research to be authorized we will work with you to understand and resolve the issue quickly, and USTDA will not recommend or pursue legal action related to your research. Should legal action be initiated by a third party against you for activities that were conducted in accordance with this policy, we will make this authorization known.

Guidelines
Under this policy, “research” means activities in which you:

- Notify us as soon as possible after you discover a real or potential security issue.
- Make every effort to avoid privacy violations, degradation of user experience, disruption to production systems, and destruction or manipulation of data.
• Only use exploits to the extent necessary to confirm a vulnerability’s presence. Do not use an exploit to compromise or exfiltrate data, establish persistent command line access, or use the exploit to pivot to other systems.
• Provide us a reasonable amount of time to resolve the issue before you disclose it publicly.
• Do not submit a high volume of low-quality reports.

Once you’ve established that a vulnerability exists or encounter any sensitive data (including personally identifiable information, financial information, or proprietary information or trade secrets of any party), you must stop your test, notify us immediately, and not disclose this data to anyone else.

Test methods
The following test methods are not authorized:

• Test any system other than the systems set forth in the ‘Scope’ section below,
• Disclose vulnerability information except as set forth in the ‘Reporting a Vulnerability’ and ‘Disclosure’ sections below,
• Sending of unsolicited electronic mail to USTDA users, including “phishing” messages,
• Network denial of service (DoS or DDoS) tests or other tests that impair access to or damage a system or data
• Physical testing (e.g. office access, open doors, tailgating), social engineering (e.g. phishing, vishing), or any other non-technical vulnerability testing,
• Introduce malicious software,
• Test in a manner which could degrade the operation of USTDA systems; or intentionally impair, disrupt, or disable USTDA systems,
• Test third-party applications, websites, or services that integrate with or link to or from USTDA systems,
• Delete, alter, share, retain, or destroy USTDA data, or render USTDA data inaccessible, or,
• Use an exploit to exfiltrate data, establish command line access, establish a persistent presence on USTDA systems, or “pivot” to other USTDA systems.

Security researchers must:
• Cease testing and notify us immediately upon discovery of a vulnerability,
• Cease testing and notify us immediately upon discovery of an exposure of nonpublic data, and,
• Purge any stored USTDA nonpublic data upon reporting a vulnerability.

Scope
This policy applies to the following systems and services:
• *.ustda.gov
Any service not expressly listed above, such as any connected services, are excluded from scope and are not authorized for testing. Additionally, vulnerabilities found in systems from our vendors fall outside of this policy’s scope and should be reported directly to the vendor according to their disclosure policy (if any). If you aren’t sure whether a system is in scope or not, contact us at security@ustda.gov before starting your research (or at the security contact for the system’s domain name listed in the .gov WHOIS).

Though we develop and maintain other internet-accessible systems or services, we ask that active research and testing only be conducted on the systems and services covered by the scope of this document. If there is a particular system not in scope that you think merits testing, please contact us to discuss it first. We will increase the scope of this policy over time.

**Reporting a vulnerability**

Information submitted under this policy will be used for defensive purposes only – to mitigate or remediate vulnerabilities. If your findings include newly discovered vulnerabilities that affect all users of a product or service and not solely USTDA, we may share your report with the Cybersecurity and Infrastructure Security Agency, where it will be handled under their coordinated vulnerability disclosure process. We will not share your name or contact information without express permission.

We accept vulnerability reports via security@ustda.gov. Reports may be submitted anonymously. If you share contact information, we will acknowledge receipt of your report within 5 business days. We do not support PGP-encrypted emails. For particularly sensitive information, please contact USTDA before sending via email.

**What we would like to see from you**

- In order to assist us in triage and prioritize submissions, we recommend that your reports:
  - Describe the location the vulnerability was discovered and the potential impact of exploitation.
  - Offer a detailed description of the steps needed to reproduce the vulnerability (proof of concept scripts or screenshots are helpful).
  - Be in English, if possible.

**What you can expect from us**

When you choose to share your contact information with us, we commit to coordinating with you as openly and as quickly as possible.

- Within 5 business days, we will acknowledge that your report has been received.
- To the best of our ability, we will confirm the existence of the vulnerability to you and be as transparent as possible about what steps we are taking during the remediation process, including on issues or challenges that may delay resolution.
• We will maintain an open dialogue to discuss issues.

**Questions**

Questions regarding this policy may be sent to security@agency.gov. We also invite you to contact us with suggestions for improving this policy.
